

Noah Lissner

FRONTEND DEVELOPER

+46 723 372 544

noah.lissner@medieinstitutet.se

Stockholm, Sweden

Education

Frontend Developer | Medieinstitutet

2021 - 2023

Web development program with the latest tools and technology in focus where I am learning and developing skills within Javascript, Typescript, React, Vue, MongoDB, Express and NodeJS to mention a few. Including areas such as Git, Scrum, Jira, and project management.

Medieproduktion & Processdesign | Malmö University

2020 - 2021

In the program Medieproduktion & Processdesign, I completed courses in HTML, CSS, JavaScript, Digital marketing, and Original production.

Interaction design | Malmö Universitet

2019

In the freestanding course, I had the chance to learn about interaction design, UX and UI on a theoretical level.

Experience

Biljardpalatset | Stockholm

2018

I worked as an "ALLT-I-ALLO" at biljardpalatset where I learned how to navigate and cope in high paced and stressful environments.

Konstella | Stockholm

2017

My responsibilities included cleanup and update of customer lists using the software Delegia, as well as work within the invoice system.

Baltic Varv | Trosa

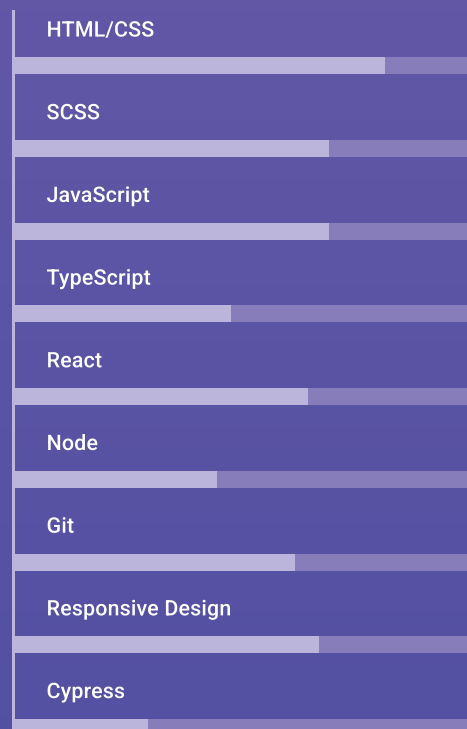

2013 - 2018

Seasonal work at the family owned business included tasks such as painting, cleaning and repairing boats.

“

After gaining hands on experience in HTML, CSS, and Javascript through high school and university, I've realized that my career path should move towards front-end development. Not only was I smitten by the creative process that goes into it, but I was also intrigued and challenged by the problem solving required to make something work. I can say that my love for design and new technologies made Front-end the obvious choice.
